

PRESS RELEASE

01.12.2015 - OpenBooks.com, Warsaw, Poland

Christmas Special: the giant of horror - GRAHAM MASTERTON joins forces with the 'Read First, Then Pay What You Want' eBookstore OpenBooks.com to become Santa by sharing his "Beholder" short story and taking part in AMA with fans

With the new OpenBooks.com Christmas feature, readers can now share their love of reading by sending Graham Masterton's "Beholder" and other open books as a gift along with holiday greetings to friends and family.

OpenBooks.com, an exciting and revolutionary new platform that lets readers download a book, read it, then pay what they want for it, has announced their latest eBook addition – Graham Masterton's fascinating and terrifying eBook "Beholder".

From the darkest depths of the imagination, ringing bells of fear, comes OpenBooks.com's Santa - Graham Masterton - a well-established British author, beloved by horror fans, most well-known for his "Manitou" series, as well as his crime and even sex instruction books! His "Beholder" is a Christmas gift for OpenBooks.com readers and tells a story about a little girl who believes that her mother is keeping her imprisoned in the house because she is too beautiful to go out.

It will definitely satisfy all dark fiction enthusiasts, says OpenBooks.com founder Michał Kiciński. We've shaken up the outdated and arrogant eBook distribution model to make sharing books easier and beneficial for both readers and writers. Each downloaded copy of "Beholder" and other open books comes with an embodied payment link. Readers can easily say thank you to Graham Masterton and other talented authors from our service by paying exactly what they feel the book was worth after reading it. And now they can also click the "Send as gift" button on the website, add holiday greetings to the eBook, and we'll deliver it in the form of a Christmas present to their friends or family.

Graham Masterton will also take part in OpenBooks.com's online "Ask Me Anything" session on

<https://openbooks.com/>

10th of December, 8-10 p.m. GMT, so fans will have a unique opportunity to pose any questions they want to him.

When asked about a trust-based economy, Masterton replied:

I believe that people are more generous these days, and prepared to pay for what they really like. I have been working closely with a young woman friend of mine who runs a cancer research charity shop and I have seen how generous people can be.

OpenBooks.com is the first online book retailer to operate its unique 'Read First, Then Pay What You Want' model. The majority of the payment received for a book via the OpenBooks.com platform goes directly to the author (70% from net revenue sales), and authors also maintain all rights to the content of their books. The platform also actively encourages unlimited sharing and copying of eBooks which, contrary to popular belief, actually provides a multitude of benefits for authors in terms of exposure and reach. Through an embedded payment link within the eBook, anyone who receives a copy of the book from a friend gets an invitation to make a payment. This provides authors with the ability to make substantial extra revenue from their books.

There are currently over 350 titles available via OpenBooks.com, covering fiction, non-fiction and self-help. The site includes pick of the week - eBooks neatly selected by the team, bestseller book lists, and community content such as user reviews and a forum where AMA sessions with authors are organised. It's clear that booklovers across the globe are embracing the OpenBooks.com 'Read, Love, Share' concept, because the numbers of downloads and payments are constantly growing.

More information about OpenBooks.com is available at the website or on Twitter and Facebook. Those interested in staying up-to-date with OpenBooks.com news can also sign up for the newsletter at the website.

Download "Beholder" on OpenBooks.com
